

ORDER DETAILS

CODE: 85007.200041

Colours: 631 Green/Grey

Size: 0/S

PRODUCT DETAILS

4 x 8m

4 x 2m

STEP 1:

Place control system on the ground with the red line winder bungee tab on the left end of the bar. Unwind and run the lines.

STEP 2:

Remove the Line Connectors* from the existing lines by disconnecting the loop to loop connection and set them aside. Take note of the Line Connector configuration.

For North kites the knotted end connectors go on the Grey (front) lines and the larks head loop connectors go on the Green (rear) lines. The red Line Connectors attach to the left-hand lines (as correspond with the coloured line winder bungee tab). The green Line Connectors attach to the right-hand lines.

*NOTE: The photo shows the correct North Line Connector configuration. For non-North kites take note of the kite specific Line Connector configuration.

STEP 3:

To ensure the plastic line stopper does not fall off the lower section of the Landing Line connected Grey (front) line during this step, slide the line stopper towards the control bar, then remove the upper section of the existing lines by disconnecting the loop-to-loop connection at the line split.

STEP 4:

Attach the new upper lines at the length combination of your choice using the loop-to-loop connection at the line split. Ensure the lines are colour matched. Slide the line stopper back up towards the line split.

STEP 5:

For North kites re-attach the Line Connectors* to the ends of the new upper lines using the orientation outlined in Step 2.

*NOTE: For non-North kites ensure the orientation of the Line Connectors matches your specific kite configuration.

WARNING: Failure to install this product correctly may result in serious bodily injury or death. Please contact your local North Retailer for support and ask for a qualified and experienced repair shop to carry out the repair. If you choose to carry out this repair yourself, please read and understand all steps contained in this installation guide before commencing installation. Take all necessary safety precautions. Safety precautions may include taking extreme care when using sharp objects and wearing all personal protective equipment necessary.
